HOUSTON, TEXAS — March 19, 2014

LabAnswer and Kona DataSearch Announce Partnership

LabAnswer, Inc. and Kona DataSearch Corporation (Nashua, NH) jointly announced today that they have entered into a working relationship that will allow R&D clients with enterprise scientific and non-scientific search challenges to have a partner that understands their knowledge management and data access requirements.

"We've identified Kona DataSearch as Subject Matter Experts in Knowledge Management and Enterprise Search. Their expertise will expand the portfolio of skills and software choices LabAnswer can provide our clients in R&D."

- Mark Everding LabAnswer President/CEO

In the partnership, LabAnswer and Kona DataSearch will work collaboratively on building and jointly providing customers with integrated solutions that will overcome some of the disparate approaches when needing to search across an R&D environment.

"The partnership with LabAnswer will allow us to provide our subject matter expertise and our proven software to customers around the globe," said Dave Hall, Chief Executive Officer, Kona DataSearch. "By partnering with a leader in scientific informatics consulting and services, Kona DataSearch can expand its already successful footprint into the R&D environments."

About LabAnswer

LabAnswer is the leading laboratory informatics consultancy combining science, laboratory, regulatory, and information technologies. It has the people, processes, methodologies, and experience to deliver comprehensive laboratory informatics solutions. As an independent third party, LabAnswer offers unbiased multi-vendor and

multi-application expertise and support, thus providing a single source for all laboratory informatics needs.

The knowledge gained from hundreds of projects allows LabAnswer to provide clients with valuable strategic and technical information from which informed investment decisions can be made. LabAnswer's deep experience with enterprise informatics solutions ensures the development of a scientific data management strategy that optimizes application portfolios while maximizing value, increasing compliance, and achieving business objectives.

About Kona DataSearch

[Kona DataSearch](#), based in Nashua, New Hampshire, allows companies to capitalize on existing Salesforce data across the enterprise from sources such as Box, SharePoint and client content including image-based PDFs. Kona DataSearch delivers secure, enterprise level search directly within salesforce.com empowering support, increasing productivity and maximizing existing data assets.
